Career Objective

I'm an aspiring Full Stack Developer who loves to code and build things. While my current superpower is the frontend—working with React.js, HTML, CSS, and JavaScript to create intuitive user interfaces—I'm currently focused on rounding out my skills with Node.js, Express.js, and MongoDB. I'm passionate about problem-solving and seeing a project through from the initial design all the way to a robust, scalable backend system. As a fresher, I'm eager to jump onto an innovative team and grow quickly into a full-stack role.

Education

Annamacharya Institute of Technology & Sciences, Tirupati
B.Tech in *Computer Science and Engineering (CSE)*
Specialization: Internet of Things and Cyber Security including Blockchain Technology
CGPA: 8.02 (up to current semester) | Expected Graduation: 2026

SKILLS

Programming Languages: Python, Java, JavaScript, C
Web Development: HTML5, CSS3, React.js, Node.js, Express.js, MongoDB
Databases: SQL, DBMS, MongoDB
Tools & Platforms: Visual Studio Code, Git & GitHub, Postman, Vercel

---

Internships

SmartBridge Educational Services Pvt. Ltd. — *MERN Stack Developer Internship*
June 2025 – August 2025
Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Git, GitHub
- Built a rental property web application using the MERN stack (React.js, Node.js, Express.js, MongoDB).
- Developed REST APIs with middleware integration and connected frontend with backend.
- Designed a responsive, animated UI using React.js (Vite) and Tailwind CSS.
- Deployed application and received official certification under APSCHE Internship Initiative.

EXCELR — *Mern stack developer*
May 2025 – July 2025
Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Git, GitHub
- Focused on backend routing and API integration using Node.js and Express.js.
- Developed responsive frontend interfaces with React.js and Tailwind CSS.
- Collaborated in a team environment using Git & GitHub for version control.

Projects

Portfolio

React.js, Vue.js, JavaScript, CSS, Vercel.

Designed and developed a responsive single-page personal portfolio to showcase technical skills and projects, implemented a clean UI/UX with reusable React components, and deployed it using Vercel.

Achievements

- Successfully completed AICTE–APSCHE certified internship in MERN Stack Development.
- Actively participated in hackathons and coding challenges
- Designed and implemented interactive mini-projects showcasing JavaScript problem-solving skills.
- Secured Runners-up position in a college-level Blind Coding Competition, demonstrating problem-solving and quick coding ability.

Interests & Hobbies

- Archaeology – passionate about exploring ancient sites and understanding cultural histories.
- Trekking – enjoy high-altitude treks and adventure travel that build endurance and teamwork.
- Interested in IoT project development and connected technologies.
